Galp further anticipates performing a Drill Stem Test (DST) in the coming weeks to assess the commerciality of this discovery. This builds upon the previous announcement made on 2 January regarding a positive sign of hydrocarbon. "The drilling operations at Mopane-1X will proceed to explore deeper targets. Upon completion, the rig will be relocated to the Mopane-2X location to further evaluate the extent of the Mopane discovery," the company said on Wednesday. – The Brief

Andrada targets 2,000 tonne tin production. Tin producer Andrada Mining plans to produce 2,000 tonnes of tin as it moves to become a major supplier of the product. The company outlined its ambitious plans in a quarterly update, saying increased tin royalties will provide it with the necessary funding to achieve its goal. "Operational performance improved against the same quarter in Financial Year 2023 due to the lower comparative base. We aim to further enhance cost efficiencies by increasing tin production through the CI2 project. The tin royalty will provide the necessary funding to produce up to 2,000 tonnes of contained tin per annum, positioning Andrada as a major global supplier," company CEO Anthony Viljoen said. Company News

JSE puts Sekunjalo on notice. Shareholders of **Ayo** and **AEEI** have been told that the exchange will suspend the shares if the companies do not release their annual reports by 31 January. It was another busy festive season for Sekunjalo Investment subsidiaries Ayo Technology Solutions and African Equity Empowerment Investments (AEEI). During December four important Sens announcements were issued by Ayo and three by AEEI. That's in addition to a few results-related Sens statements from each of the listed entities. December has been a special time of year for Ayo ever since it was listed on 21 December in 2017. That listing went largely unnoticed by the JSE community, either because they were caught up in festive distractions or because they were trying to calculate how much they had lost on their Steinhoff investments. – Business Day

Transfer of Cell C mobile licence to **Blue Label** hits snags. An objection by CellSaf, a big shareholder in Cell C, might sink the scheme by mobile operator Cell C and major shareholder Blue Label Telecoms to transfer the network's operating licence as well as its rights to operating frequencies to a Blue Label subsidiary. CellSaf points out that the licence is worth billions in itself and the Independent Communications Authority of SA (Icasa) cannot allow the transfer. – Moneyweb

Naspers boosts SA investments ahead of Amazon arrival. Naspers, Africa's largest company by market value, is boosting investment into its South African online retailer ahead of Amazon.com's entry into the country's fast-growing e-commerce market. "We are investing a lot more into our businesses," Phuthi Mahanyele-Dabengwa, CEO of Naspers's South African unit, said in an interview on Bloomberg TV on Wednesday. – Moneyweb

Telkom shares rebound 35% amid signs of progress to cut debt. Telkom's share price appears to have found a base after a topsy-turvy two years during which several companies at various stages tried unsuccessfully to lay their hands on its assets. The value of its shares has rebounded 35% over the past three months to trade at R30 on the JSE on Wednesday, having bottomed out at R20.60 in October 2023. However, it is only a tiny fraction compared with the dizzy heights of R100 reached in 2019. Nitrogen Fund Managers portfolio manager Willem Oldewage said market concerns about poor free cash flow generation and an escalating net debt to EBITDA ratio clouds its outlook. – Business Day

Government Bond Auctions

Next Auction Date: 12-Jan-24

Commentary on Previous Auction:

The BoN received 113 bids worth N\$283.3m for the N\$195.0m worth of bonds on offer at the 22 November auction. The GCs recorded a bid-to-offer ratio of 1.25x, while the GIs logged 2.22x. Demand continued to favour the short end of the curve, with the central bank under-allocating on the GC32, GC35, GC40, GC43, GC45, GC48 and GC50. However, the BoN opted to over-allocate on the GC26, GC28 and GC37. The central bank ended up raising N\$182.7m of the N\$195.0m targeted issuance. Spreads increased by 12bps on average on the bonds that received allocations and the yields of the ILBs were once again little changed from their pre-auction levels.
