Deep Yellow pushes out FID on Tumas uranium project in Namibia. ASX-listed Deep Yellow has delayed a final investment decision (FID) on the Tumas uranium project, in Namibia, given continued weak equity market conditions. The company was due to announce an FID during the fourth quarter, but maintains full confidence in the quality of the asset as a next-generation, secure and reliable supplier of uranium. Civil works such as concrete preparation, reinforcing steel installation and off-site pre-casting continue in the meantime. The expenditure for the current civil and concrete works is fully funded with the company's current cash reserves. – Mining Weekly

IMF projects Namibia's current account deficit to widen to 16.9% of GDP. Namibia's current account deficit is projected to widen to 16.9% of gross domestic product (GDP) in 2026, from 13.1% in 2025, as the country faces growing external financing requirements amid sluggish economic growth, according to the International Monetary Fund (IMF). The IMF's October 2026 Sub-Saharan African Economic Outlook projects that the deficit will narrow to 14.4% of GDP in 2027, but remain significantly above regional averages. The widening deficit means Namibia is expected to pay more to the rest of the world for goods, services and other obligations than it earns through exports and other external income, leaving a financing gap equivalent to nearly 17% of its annual economic output. – The Brief

SA Economic News

South African President Cyril Ramaphosa has urged the country to prepare for the possibility of losing preferential access to the United States market under a key African trade programme, as relations between the two countries continue to deteriorate. The African Growth and Opportunity Act, or AGOA, which allows eligible African countries to export certain goods to the US duty-free, has been renewed by Congress until the end of 2028. The extension now awaits President Donald Trump's signature. South Africa is the programme's largest beneficiary, but its eligibility has come under scrutiny from Washington. Ramaphosa says the country must prepare for exclusion, while seeking alternative markets to cushion the impact. He warned the consequences would be "devastating", but urged South Africans not to panic.

Commentary on Previous Auction:

This morning's government bond auction, at which the BoN offered N\$2.04bn to fund coupon payments, attracted strong demand. The BoN received bids totalling N\$4.18bn across the GCs and GIs, an overall bid-to-offer ratio of 2.05x. This was an improvement on July's auction, which offered more (N\$2.20bn) but drew fewer bids (N\$3.95bn), a ratio of 1.80x. The seasonal bonds (GC30, GC32 and GC35), which returned to the auction today, attracted strong interest. The GC35 drew bids of N\$508.9m, while the GC30 recorded the highest bid-to-offer ratio of the auction at 4.82x. As expected, demand was concentrated in the short- to medium-dated bonds (GC29 to GC40), which accounted for more than half of total bids. Further along the curve, the GC43 (1.31x), GC45 (1.29x) and GC48 (1.09x) were also oversubscribed, while the GC50 (0.60x) and GC53 (0.68x) were undersubscribed.
